DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-99 and 115-155, drawn to a method of using data encoded card, classified in class 235, subclass 380.
 - II. Claims 100-114, drawn to a method of sharing a software program, classified in class 705, subclass 50.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the method of providing point-of-sale activated delivery of a product or a service of Group I could be applied to any product or service. The subcombination has separate utility such as controlling access to a computer system and software or authentication of a user.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Todd B. Murrah on May 2, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2876

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
